

TEXAS TEST PLUGS

- Precision
- Compliance
- Confidence

- Off-the-shelf delivery
- Made in the U.S.A.
- 2-year Warranty
- Multiple materials

Pressure/Temperature test ports. Test plugs are versatile pressure and temperature (P/T) test ports used across a wide range of industries. Brass and SS.

Test Kits provide an easy-to-manage collection of products needed for checking temperature and pressure. Small and large kits are available.

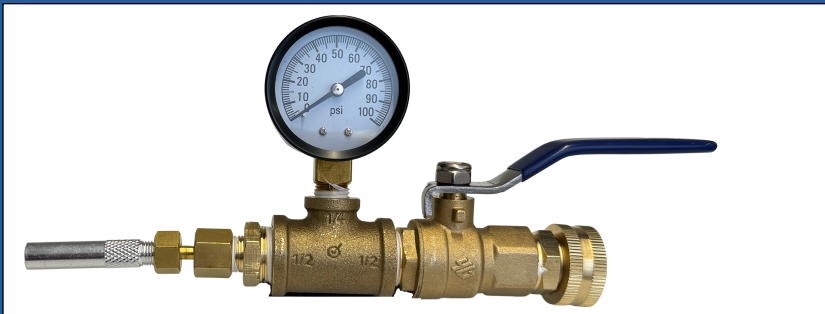

2 1/2" and 3 1/2" Liquid-filled Pressure Gauges.

Premium quality with chrome bezel. Customer name-on-the-dial is available.

A **Geo-Gooser** is used to add water or other loop fluid to a geothermal heat pump. A garden hose connector with filter is on one of the Geo-Gooser, and a standard pressure probe on the other. A ball valve provides flow control. A 100 PSI gauge is standard and is used to provide a basic static pressure check.

Gauge Adapters are used for connecting a pressure gauge to the test port.
