

## Pressure and Temperature Test Plugs

www.txtestplugs.com

Our **brass P/T test plugs** provide a simple, reliable access point for measuring system pressure and temperature in hydronic and HVAC applications. Manufactured in the United States from high-quality brass, these plugs are designed for long service life, leak-free performance, and consistent accuracy. Compatible with standard test instruments, they offer a cost-effective alternative to permanent gauges while maintaining system integrity. Ideal for routine diagnostics, commissioning, and maintenance across a wide range of liquid and gas systems.

### **Stainless Steel P/T plugs**

Stainless steel test plugs are a critical item in data center liquid cooling systems. They are used for safely accessing closed-loop systems to measure pressure and temperature. Stainless steel provides corrosion resistance against the glycol/water mixtures used in the cooling systems.

### **Available Materials:**

Our test plugs are available in four different materials

1. Free-machining brass. The industry standard and the least expensive.
2. Lead-free brass. Typically used in food or potable water applications.
3. 303 Stainless steel. Widely used in data system and similar cooling systems.
4. 304 Stainless Steel. Used in some data center cooling systems. Not as commonly used as 303.

### **Off-the-shelf Delivery:**

We maintain a large test plug inventory. Most orders ship within a day.

**Made in the U.S. 2-year Warranty**

Part Number	Core Material	Max Temp
N-76-01	Neoprene	200° F
N-76-02	Nordel	300° F

Part Number	Core Material	Max Temp
N-76L-01	Neoprene	200° F
N-76L-02	Nordel	300° F

Part Number	Core Material	Max Temp
N-78-01	Neoprene	200° F
N-78-02	Nordel	300° F

N-78L-01	Neoprene	200° F
N-78L-02	Nordel	300° F

Spec numbers:

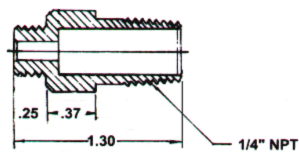

The part numbers on the left are for the standard free-machining brass.

Specify a different body material by adding a dash number, for example.

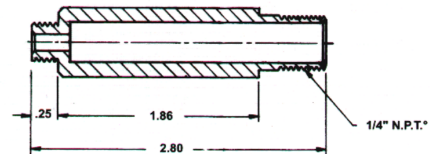

N76-01-LF for lead free

N76-01-SS for 303 stainless steel

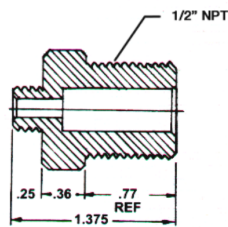

N76-01-SS-4 for 304 stainless

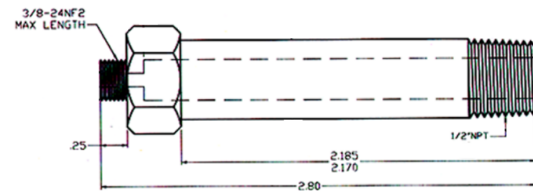

**N-76 1/4" NPT P/T Plug**

**N-76L 1/4" NPT Lagg P/T Plug**

**N-78 1/2" NPT P/T Plug**

**N-78L 1/2" NPT Lagg P/T Plug**
